Walking holidays in the Mercantour national Park

Self guided tour Luggage transportation by car

A new walking tour by the brand of French national parks :

A triumph for nature :

In 1993, the Alp-Maritime Park and the Mercantour National Park were awarded the European Environment Diploma.

This diploma is awarded to internationally recognised natural areas in which nature conservation is particularly important due to their scientific, cultural or recreational value or their natural beauty.

The National park of Mercantour :

Since it was created in 1979, the Mercantour Park has become one of the most popular of the French national parks. The protected area covers some 685 square kilometres, consisting of a central uninhabited zone comprising seven valleys. The preservation of ecosystems is essential for maintaining biodiversity. In particular, this allows exchanges between members of the same species and allows them to adapt to changes in their environment.

The very new brand « Esprit Parc » :

The « Esprit parc national » brand highlights products and services imagined by local actors who have chosen to adopt a sustainable approach in accordance with the principles of the French National Parks, and who are committed to preserving and promoting these exceptional territories.

The brand is a guarantee of respectful practices to preserve the National Parks by slow tourism.
